

Snowboard-X

Distinctive 

Palm

Version 1.0

User Guide

Game Description

Complete courses from easy to extreme difficulty (and style!), passing between flags to remain on course. Perform tricks to extend your time and gain high scores. Tricks possible include simple ollies, 360's, various grabs, somersaults and more. Jumps are available to provide a height boost for the more adventurous boarder going for incredible trick combos. Strict time limits mean that bailing can cost you the game! Don't let the groms beat you, and get down the course in double quick time to claim that high score.

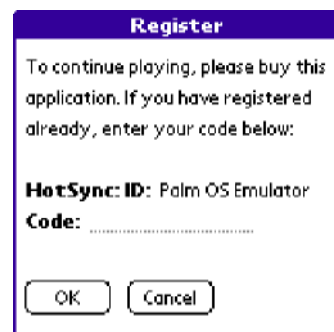

Requirements

1. A Palm OS v4.1 or higher with colour screen and 200KB of free memory.

Installation

To install the game simply connect your Palm device to your computer and HotSync the game across. Once this is complete you should see the 'Snowboard-X' icon on your Palm.

Registration

Once the game is installed on your Palm the game needs a registration code in order for you to play the full game.

You will be given your registration code when you buy the game. Be sure to have your HotSync ID at hand when you make your purchase.

Once you have the registration code, select 'Register' from the main menu of the game and type in the 5-digit registration code. You should now be able to play the game fully.

Playing

The game can be controlled either by using the buttons on the Palm or by tapping on the screen area. In the menu system the items can be selected by either tapping on the screen over the item you want or by using the up/down keys. In the game, the screen is split into three sections horizontally, the left portion makes the boarder go left, the right portion makes him go right and the centre portion controls up and down. To pause the game tap the screen in the top-left hand corner.

Snowboard-X has two modes of play; Trick Mode and Time Mode. Each mode has four courses; can you beat the highest scores and the fastest time on all the courses?

Trick Mode

The aim of the trick mode courses is to snowboard down the course and perform as many tricks off the jumps as possible. A combination of tricks will result in a much higher score since the trick score is multiplied by the length of the combo but make sure you are not in the middle of a trick when you hit the floor or you will be sliding along on your face. The tricks are performed by pressing a combination of keys or taps on the screen. To get you started try pressing up and then up again while in the air. Only tricks that have been performed on a successful jump, one that doesn't result in a crash, will result in points and time being awarded.

Time Mode

The aim of the time mode courses is to snowboard down the course as quickly as possible and pass through all the gates along the way. The gates are marked with red flags. Failure to go through the gates will result in a 10 second penalty being added to your time.

Happy boarding!
