

MP3Go for Symbian 6.1, 7.0s and 8.0

Steps to copy MP3 files from PC to the Symbian phone/memory card

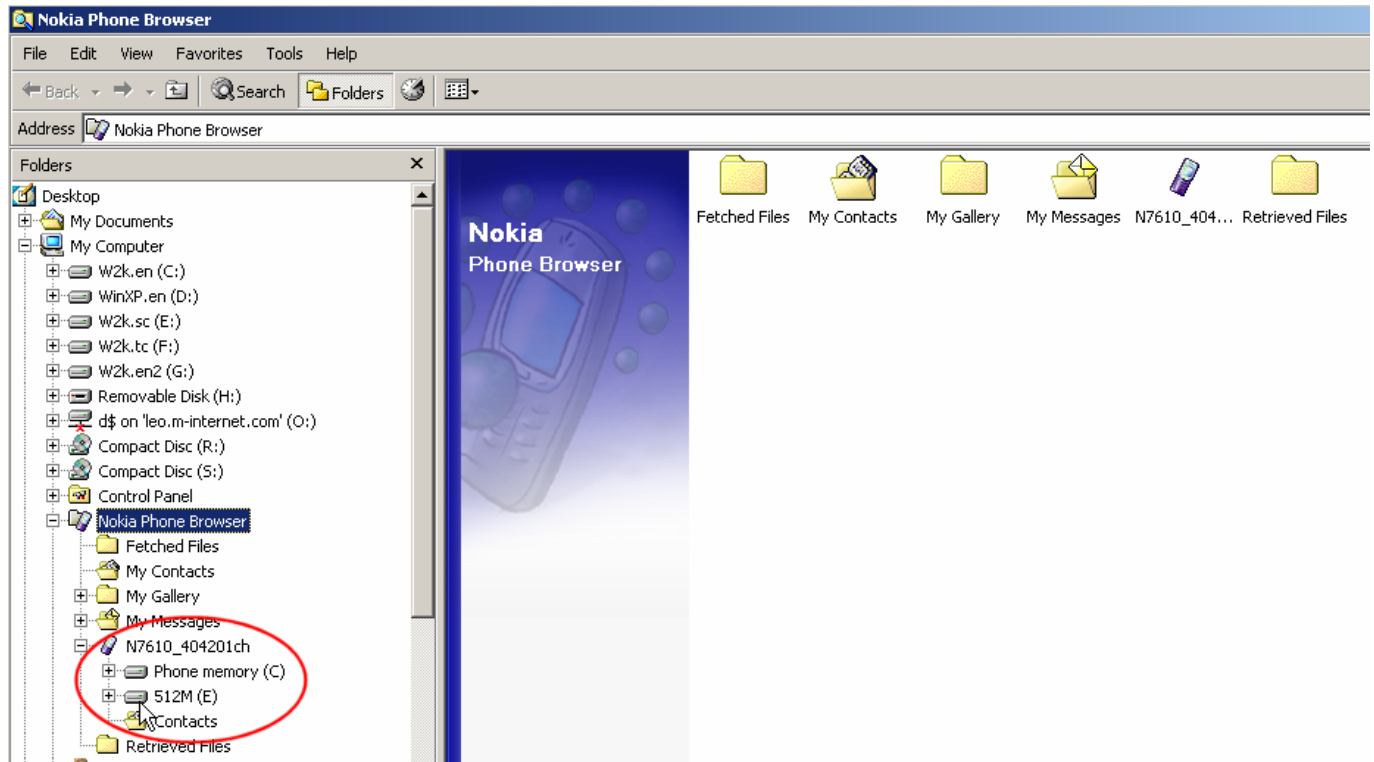

This document describes the steps how to copy MP3 file from a PC to the phone via PC Suite for Symbian phones. It is also recommended to use a MMC card reader/writer to copy MP3 files as an alternative (sold as separate purchase).

For Nokia 7610/6670/6260, PC Suite version 6.41 or higher:

- a. Start your PC Suite, then select “General - Transfer files”:

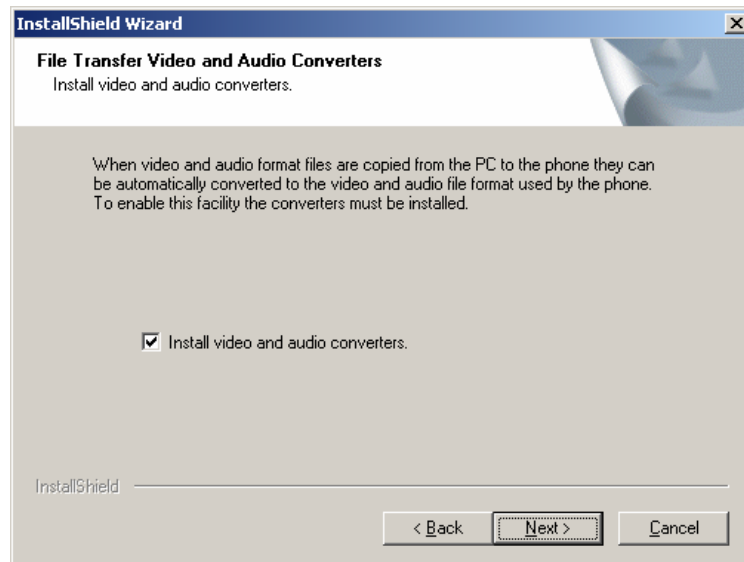

- b. A Windows Explorer is open, you can see the Symbian phone folder (the name is defined in your phone's Connectivity, e.g. N7610_404201ch), then you can just use mouse's drag-&-drop action to copy/move your MP3 files either to the phone main memory or MMC (recommended):

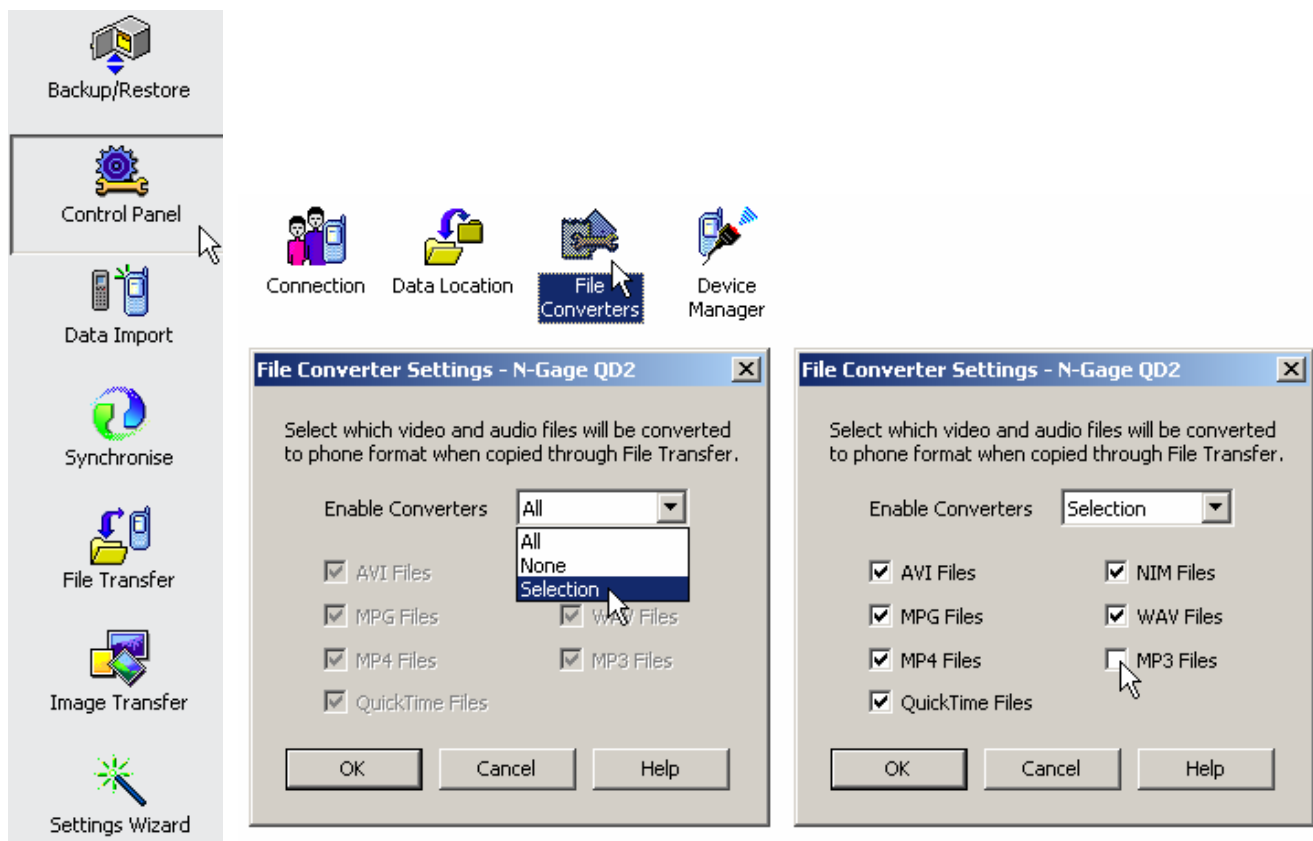

For Nokia N-Gage/N-Gaga QD PC Suite 1.30 or above; Nokia 6600, PC Suite version 1.0/1.1 or above; Nokia 3650/3660, PC Suite 4.81 or above (Audio/Video converters already installed):

During installation, if you have selected to install the Audio/Video converters as shown below, then the PC Suite will convert MP3 extension file to .Wav prior copying to your phone.

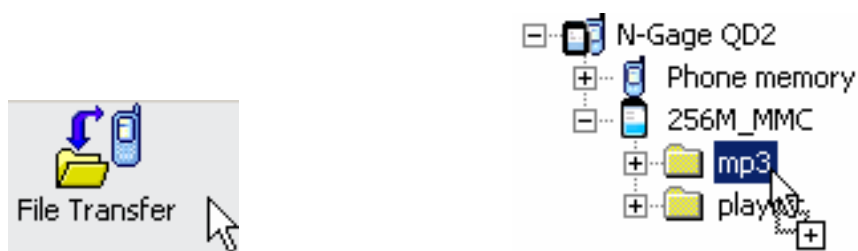

Then you are required to uncheck the auto-convert function as follows:

- a. Start your PC Suite, then in left-panel select “Control Panel”-> “File Converters” -> set “Enable Converters” to “Selection”. Uncheck “MP3 files”.

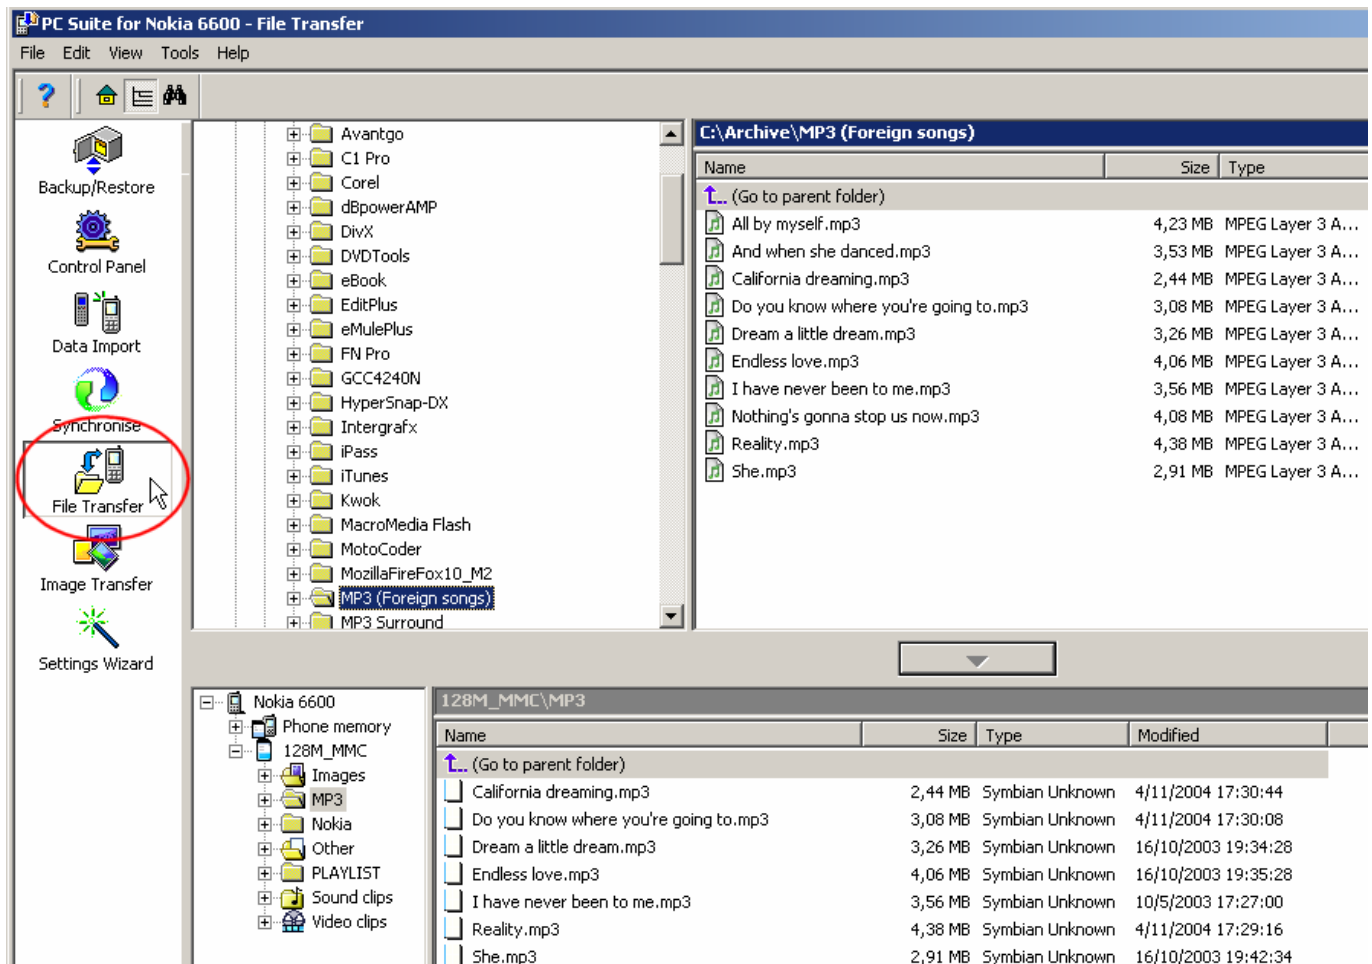

- b. Now you can select “File Transfer” in left-panel and drag-&-drop your favorite MP3 files to a specific location:

For Nokia N-Gage/N-Gaga QD PC Suite 1.30 or above; Nokia 6600, PC Suite version 1.0/1.1 or above; Nokia 3650/3660, PC Suite 4.81 or above **(without installation of Audio/Video converters during installation):**

- a. Start your PC Suite, then in left-panel select “File Transfer”:

- b. Using mouse to drag-&-drop your MP3 files from upper screen (PC's folder) to bottom screen (phone's main memory/MMC):
