HOW TO GET THE SERIAL NUMBER FOR “MULTILEX” DICTIONARY	11

General information

The “**Multilex**” program is a multilingual dictionary for **NOKIA 9500 Communicator** devices. Advantages of the program are:

- Great number of word entries;
- Low memory consumption;
- The possibility to select one of six interface languages;
- The possibility to install several language pairs simultaneously;
- Color formatting of word entries;

- History saving (last words that you searched), you can see any word from the history again at any time;
- Transcription support;
- The possibility to install “**Multilex**” to expansion cards;

Some language versions of the “**Multilex**” dictionary are available in several editions: **compact**, **extended**, **unilateral** and other. You can choose any, in accordance with your needs and device memory limitations.

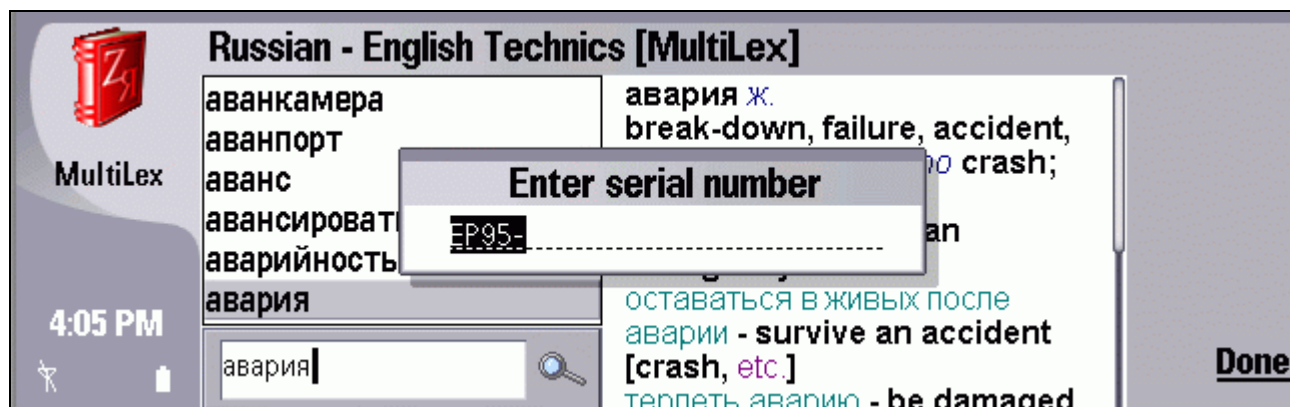

You can choose any of six “**Multilex**” interface languages: English, German, French, Italian, Spanish and Russian.

High data compression ratio for dictionaries with a high access rate is available due to the special technology developed by **Epocware / Paragon Software Group** (<http://www.epocware.com>).

The Full list of the dictionaries databases is available at <http://www.epocware.com>.

Registration and demo version limitations

The more you use an unregistered dictionary, the more you see a message about its registration procedure. To register your copy of the dictionary, enter your serial number in the dialog box **Menu/Dictionary/Register**:

You receive the serial number for your dictionary registration after purchasing the software (the detailed info about how to obtain your serial number is available in the correspond section ([“How to get the serial number for “Multilex” dictionary”](#))).

Installation

Note!

- Don't forget to perform backup of all your data before installation of new programs (including “**Multilex**”)! It will help you to avoid casual data loss.
- In order to choose “**Multilex**” interface language during the installation, set the option “default installation language” (**Tools/Control panel/Data management/Application manager/Preferences/Preferred language**) to a meaning, different from English.

There are two ways of the dictionary installation - from your desktop computer using the PC Suite software and directly from your device:

Direct installation from the device

- Copy the installation sis file from the desktop computer to any folder of your communicator;
- Start the installation sis file on your device;
- Follow the instructions of the installation program.

Installation from your desktop computer

To install your dictionary from your desktop computer you should do following:

- Connect your **NOKIA** device with the desktop computer using the PC Suite program;

- Start the installation file on your desktop computer;
- Follow the instructions of the installation program.

After the installation is finished, the “**Multilex**” icon will appear in the Applications list.

Several dictionaries installation

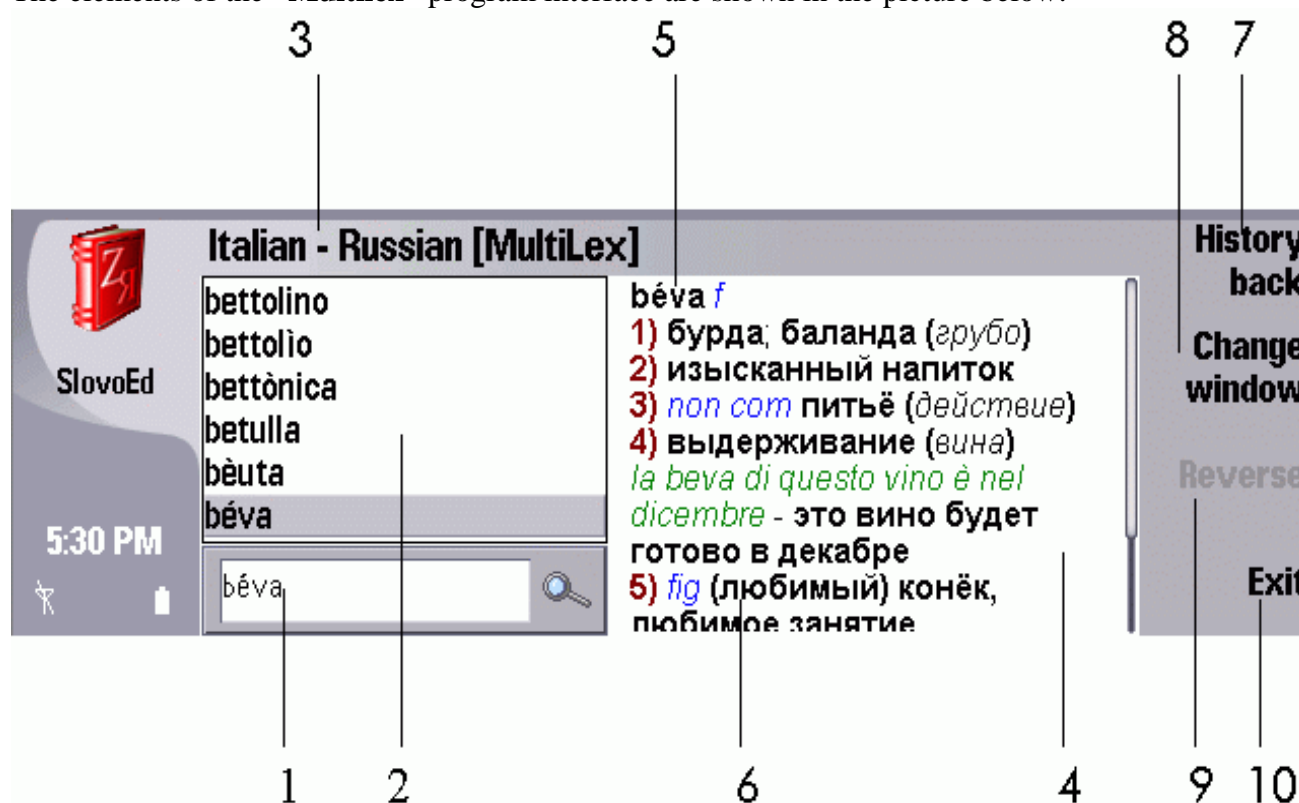

You have the possibility to install the “**Multilex**” program with several dictionary databases simultaneously. To do that you should start the installation files of every dictionary one after another and install them.

Thus you will be able to use several dictionaries simultaneously and change the dictionaries through the menu item **Dictionary/Choose dictionary...**

Using “Multilex”

Elements of the dictionary interface

The elements of the “Multilex” program interface are shown in the picture below:

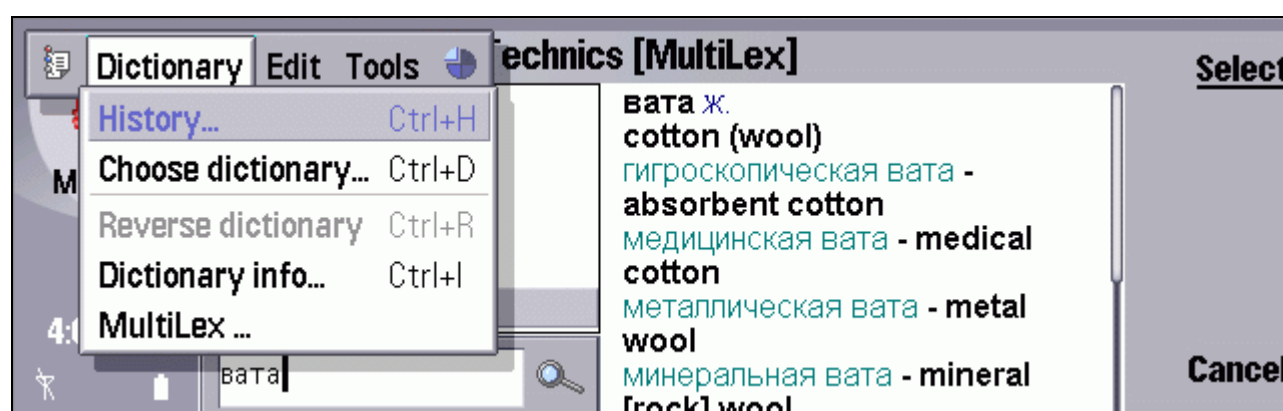

The elements of the program interface have the following values:

1. Entry field;
2. List of words available in the dictionary;
3. The active dictionary title;
4. Translation field;
5. Found word;
6. Translation of the word entry. All the meanings of the translation are numbered and may contain some extra information;
7. The **History back** button for quick return to the word entry that you looked up earlier;
8. The **Change window** button for changing the active window;
9. The **Reverse** button for switching the dictionary to the pair dictionary;
10. The **Exit** button.

Dictionary menu

The “Multilex” menu includes three sections: **Dictionary**, **Edit**, **Tools**:

The **Dictionary** section includes the following items:

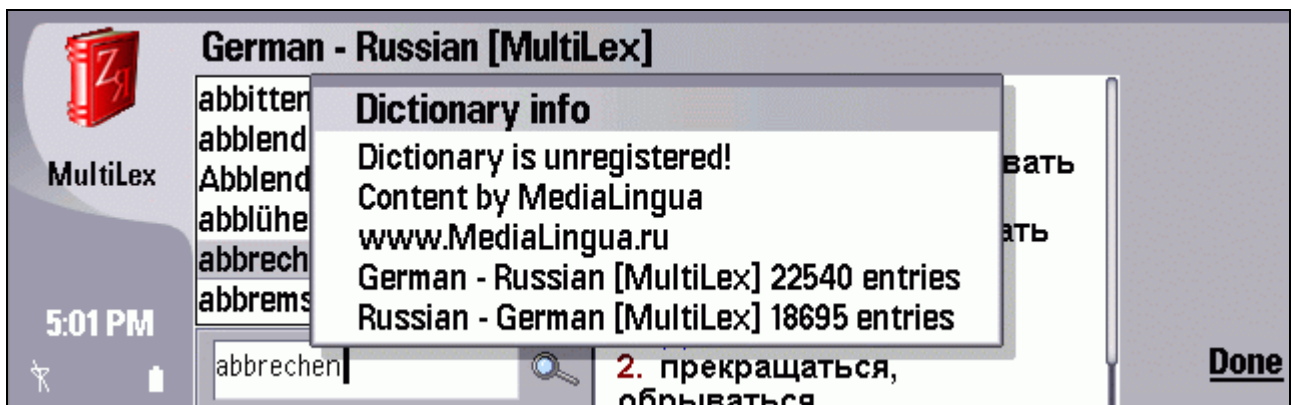

- The menu item **History** allows you to look up 10 last word entries, that you searched before and select one if necessary;

- The menu item **Choose dictionary** allows you to select one of the installed dictionaries;

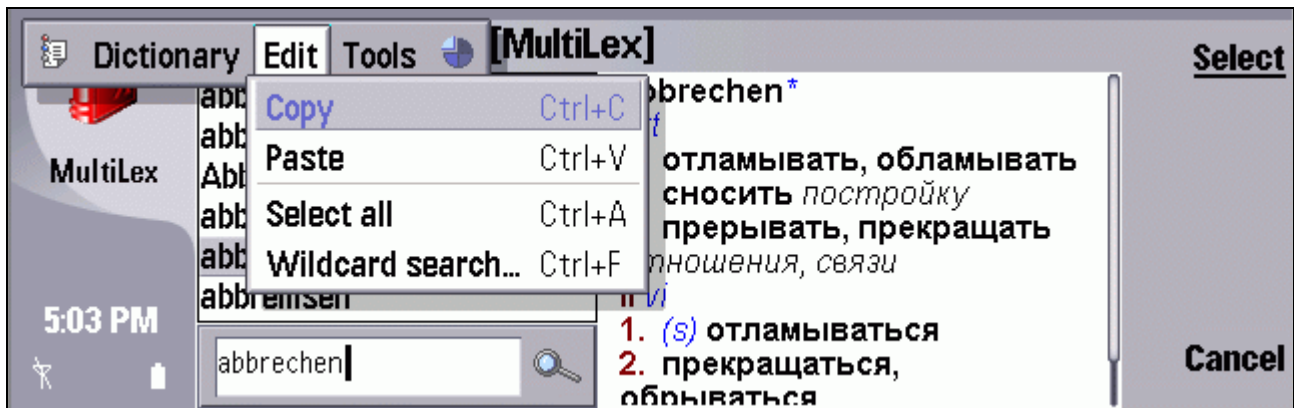

- The menu item **Reverse dictionary** allows you to switch the dictionary to the pair dictionary;
- The menu item **Dictionary info** allows you to get the information about the active dictionary;

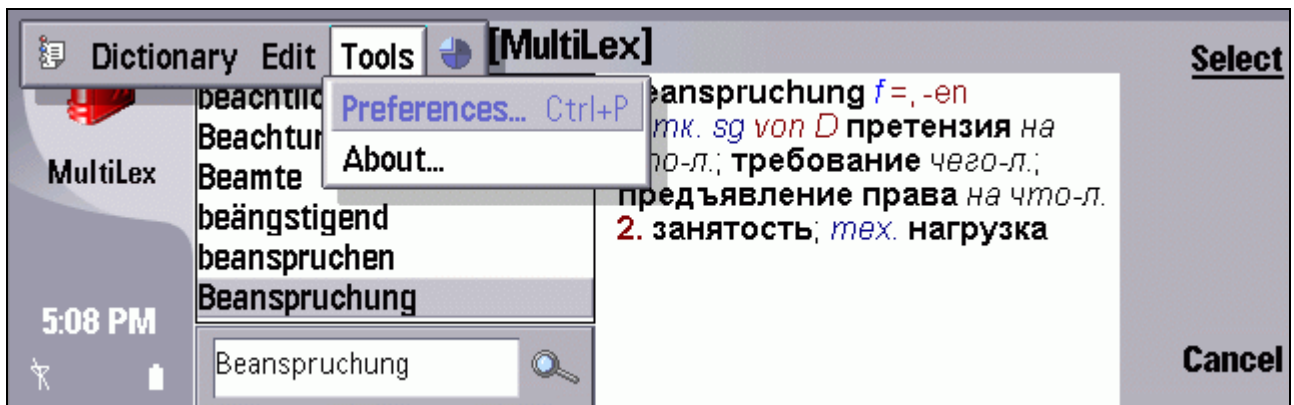

- The menu item **Register** allows registering the current dictionary. More detailed information about dictionary registration is available in the section [“Registration and demo version limitations”](#).

The **Edit** section contains the following items:

- The menu item **Copy** allows you to copy the text selected in the active window into Clipboard;
- The menu item **Paste** allows you to insert text from the clipboard into the edit field;
- The menu item **Select all** allows you to select the whole contents of the active window (for the following copying, for example);
- The menu item **Wildcard search**. The detailed information about this function you can find in the section [“Search of words in the dictionary”](#).

The **Tools** section contains the following items:

- The menu item **Preferences/Text size** allows you to change the text size in the translation field:

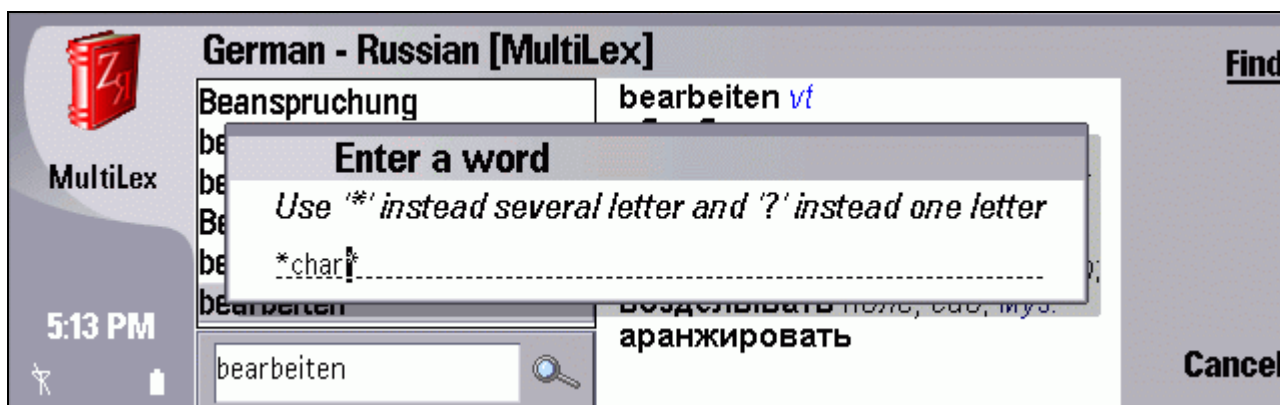

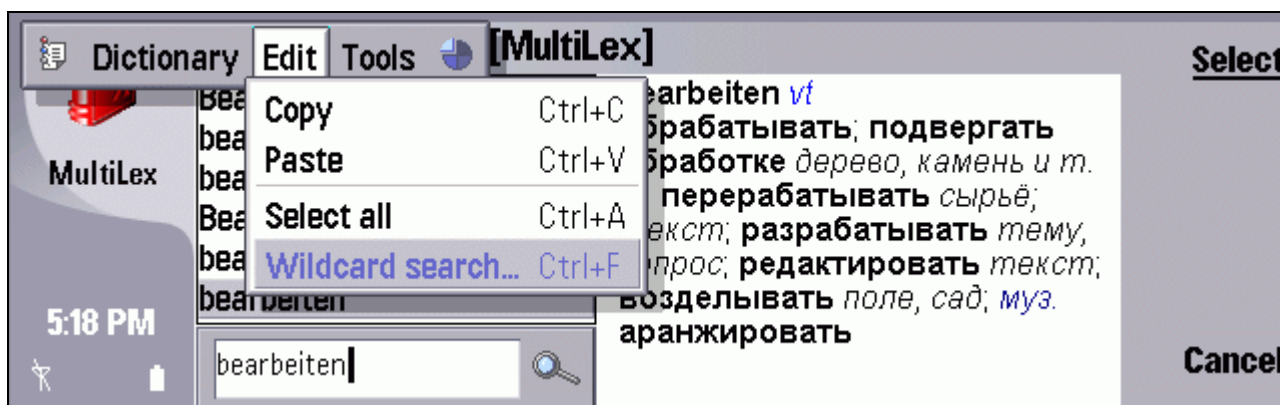

There are several ways of searching a word:

-
- The screenshot shows the MultiLex software interface. The 'Edit' menu is open, displaying the following options: Copy (Ctrl+C), Paste (Ctrl+V), Select all (Ctrl+A), and Wildcard search... (Ctrl+F). The background window shows a dictionary entry for 'дым' (smoke) with various translations and a search bar at the bottom.

- 8

press the Enter. The dictionary will immediately switch to the pair dictionary and start searching and if the found word is in the databases, you will receive its translation;

- In the dictionary there is also the function **Wildcard search (Menu/Edit/Wildcard search)**, which allows you to search for doubtful words using a mask. Question-mark (?) could be used instead of a single character and asterisk (*) instead of any character or group of characters:

Hotkeys for quick manipulation with the dictionary

There are some hotkeys to act quickly in the dictionary:

Tab	Change the active window
Ctrl + H	Open history
Ctrl + D	Choose dictionary

Ctrl + R	Reverse dictionary
Ctrl + I	Open “About” dialog
Ctrl + C	Copy text into Clipboard
Ctrl + A	Select all text
Ctrl + P	Open preferences
Ctrl + F	Set search after former
Ctrl + E	Close “Multilex”
Enter	Translate word
