# License Agreement

\*\*\* Please read this entire agreement \*\*\*

This End-User License Agreement (the "Agreement") is a legal agreement between you ("Licensee"), the end-user, and Mobile Systems, Inc. ("Mobile Systems") for the use of the MSDict Viewer software product ("SOFTWARE"). By using this Software or any part of it, you are agreeing to be bound by the terms of this Agreement. If you do not agree to the terms of this Agreement do not install this Software.

## License and Distribution

The evaluation copy of this Software is free of charge for a limited period of time. You must pay the license fee and register your copy to continue to use the Software and remove the nag screen. Until you purchase and register the product you will not be able to access the additional databases provided by Mobile Systems Inc.

The evaluation copy is fully functional except for the time limitation for which you can use the software. You're allowed to make as many copies of this evaluation version (in UNMODIFIED form) as you wish to distribute.

## Restrictions

You may not, nor permit anyone else, to de-compile, reverse engineer, disassemble, modify, or create derivative works based on the SOFTWARE or the documentation in whole or in part. You may not use the SOFTWARE for any commercial purpose or public display, performance, sale or rental. You may not use the SOFTWARE to perform any unauthorized transfer of information (e.g. transfer of files in violation of a copyright) or for any illegal purpose.

## No Warranties

This SOFTWARE and any related documentation is provided "as is" without warranty of any kind.

Mobile Systems, Inc. specifically disclaims all warranties, expressed or implied, including but not limited to implied warranties of fitness for any particular purpose and of merchantability.

## **Limitation of Liability**

In no event will Mobile Systems, Inc. be liable to you for any damages, including but not limited to any loss of data, lost profits, lost savings, commercial damage or other incidental or consequential damages arising out of the use or inability to use this program directly or indirectly, or for any claim by any other party.

# Getting Started

## Welcome to MSDict

MSDict is a specially designed dictionary integrator and utilizer for Symbian Series 60 smart phones. MSDict provides you with the best possible features for a dictionary program, which includes fast searches, strong database compression, and stylish and intuitive user-friendly interface.

MSDict works with database files, called *dictionaries*. MSDict allows several dictionaries to be installed at a time.

## System Requirements

Any Symbian Series 60 running device.

Compatible devices:

- ◆ Nokia 7610
- ◆ Nokia 6600
- ◆ Nokia 6620
- ◆ Nokia 6630
- ◆ Nokia 6260
- ◆ Nokia 6670
- ◆ Nokia 3230
- ◆ Nokia N-Gage QD
- ◆ Nokia N-GageTM
- ◆ Nokia 3660
- ◆ Nokia 3620

- ◆ Nokia 3600
- ◆ Nokia 3650
- ◆ Nokia 7650
- ◆ Panasonic X700
- ◆ Samsung SGH-D710
- ◆ Sendo X
- ◆ Siemens SX1

## Installation and Un-installation

### *Installing MSDict*

1. Download MSDict (.zip) or (.sit) file for desired dictionary on your desktop PC.
2. Extract the zip or sit (for Mac OS) archive file to desired folder on your desktop PC. The archive file contains:
  - Installation SIS file for the dictionary reader and the selected dictionary database(s)
  - User's guide for the MSDict dictionary reader
  - User documentation for the dictionary database
3. Enable the Bluetooth transfer on both the desktop PC and SmartPhone and use the Bluetooth connection to install the SIS files on your mobile device.

---

If you have downloaded the software directly from your phone, skip the first three steps.

---

4. The new installed SIS files will appear as new messages in the inbox of your phone. Start the SIS files to install MSDict Viewer or and/dictionary databases for it.
5. Follow the instructions on the screen to install the software. Once the installation is complete the MSDict icon will appear in the application launcher on your phone.

## ***Un-installation***

To delete a dictionary or the MSDict Viewer program from your mobile device:

1. Use the hardware application button and open the *application launcher* on your phone.
2. Select the **Configuration icon** and then **AppMgr** to start the application managing utility.
3. Select MSDict or the dictionary that you want to uninstall and press the **Options button**.
4. Select **Remove** from the pop-up menu that will appear.
5. A message notifying you of the deletion will appear. Press **Yes** to confirm.

## ***Installation of Additional Dictionary Databases for MSDict Viewer***

MSDict Viewer allows the use of multiple dictionary databases. If you have a copy of MSDict already installed on your PDA, follow these steps to install additional dictionaries.

1. Download the dictionary database and extract the archive ZIP or SIT file in a temporary folder on your desktop computer.
2. Enable the Bluetooth transfer on both the desktop PC and SmartPhone. Use the Bluetooth connection to install on your mobile device the SIS file from the folder where you extracted the ZIP or SIT archive.

---

If you have downloaded the software directly from your phone, skip the first three steps.

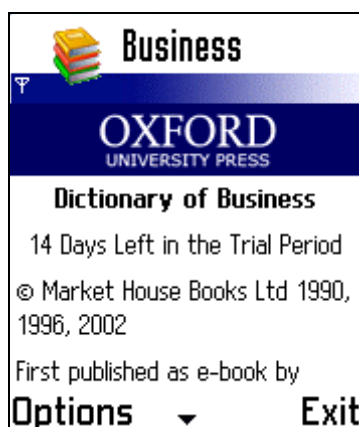

---

3. The new installed SIS files will appear as new messages in the inbox of your phone. Start the SIS files to install the dictionary database.
4. Follow the instructions on the screen to install the software. Once the installation is complete, start MSDict from the *application launcher* and the program will automatically recognize the new dictionary.

5. Press the **Options button** and then select **Change Dictionary** from the pop-up menu that will appear.
6. You will find the new installed dictionary in the list of available dictionary databases so you can select and you it.

Please note that once a new installed dictionary is made active, it will require separate license key even if the dictionary viewer MSDict is already registered. Screen similar to the one bellow may appear, notifying you that you are using the dictionary in trial mode.

Go to Mobile Systems home site [www.mobi-systems.com](http://www.mobi-systems.com) to purchase a license for the desired dictionary.

## Registration

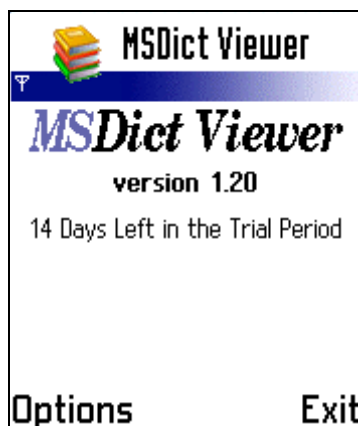

MSDict and each of the commercial dictionaries that it utilizes are downloadable shareware products available for free evaluation period or registration at our home site: [www.mobi-systems.com](http://www.mobi-systems.com). The trial period is 15 days, after which you should register the product to keep using it.

To register your copy of the software, order the product at <http://www.mobi-systems.com>. A license key for the software will be sent to the e-mail address specified during your order shortly.

The *Unlock Key* is a numeric combination of 2x5 symbols (for example: **32454-11562**), which you will receive after the successful completion of your online order.

To license your copy of MSDict or additionally installed dictionary:

1. Start the software from the applications launcher. The following form will appear.

2. Select **Options** and then **Register** from the popup menu that will appear.
3. Type in your *Unlock Key* in the provided space.

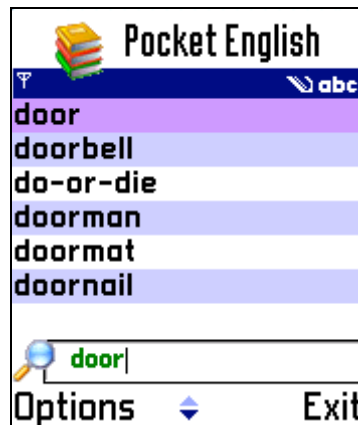

4. Tap on **OK** to confirm or **Cancel** to abort the entry.

Please note that any additionally installed commercial dictionaries will require separate key that may not be included in your license.

# Using MSDict

## Word Lists

When you start *MSDict Viewer* for the first time, the program will automatically locate all installed dictionary databases on your device and make active the first dictionary found. After you complete the registration procedure and provide the license key for the software, or alternatively select to use MSDict and the selected dictionary in trial mode, the following screen will appear.

This is the MSDict *Word List*, which shows all words in the currently opened dictionary, sorted in alphabetical order. In the upper part of the screen just above the *Word List* is shown the name of the dictionary that is active at the moment.

You can move up and down the dictionary items and pages through the up and down scroll buttons on the five-way navigator on your phone. The arrows  located in the down part of the *Word List* show the direction in which you can scroll.

To open a word article, scroll in the *Word List* form to the desired word and press the center button of the five-way navigator.

## *Search and Filtering of Words*

To search for a particular word or word form, you simply need to type it into the

*search query field*   located in the *Word List*.

As you are typing the program will dynamically filter the words that satisfy the search condition entered so far. To disable the filtering option, press the **Options button** and then select the *Filter menu option*. Press the **OK** button in the center of the five-way navigation bar to switch off the filter. In the same way you can enable the filter again by selecting the *Filter menu option* once again. When the filter is disabled you have to type on a whole word and press the **OK button** in order to search words.

## *Filtered Queries*

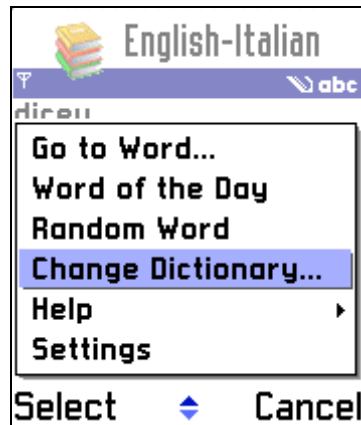

In some particular cases you may need to search words by not providing all letters in the word. The result will usually return a group of word entries, satisfying the predefined condition. MSDict allows you to make such queries by using the \* symbol to substitute unknown letter or group of letters.

For example, if you type “dic\*y” and press the **OK button** you will get a list of all words in the dictionary, the first three letters of which are “dic” and the last one is “y” (i.e. dictionary, dicey, etc.).

## *Changing the Active Dictionary*

As already noted, MSDict Viewer allows several dictionaries to be installed at a time, and they can be switched between according to the particular needs of the user. This can be done by using the **Change Dictionary** menu option, which is available when you select the **Options** button in *Word List*.

A pop-up menu lists will appear which will show all installed dictionaries on the mobile device. The only thing you need to do to change the dictionary is to select the one you require, using the five-way navigation controls.

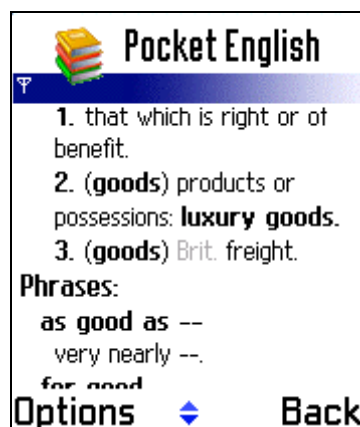

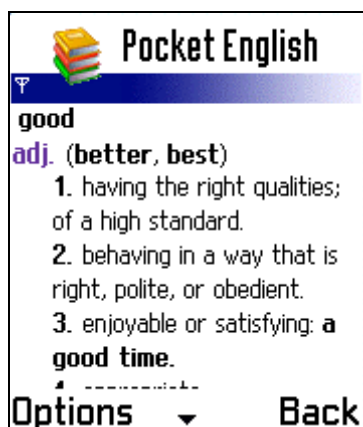

## Word Articles

### *Visualization of Word Articles*

When you select a word entry from the *Word List*, you will be redirected to the corresponding *Word Article*. Different colors and font styles are used to highlight the objects in an article. The visualization of word article depends on the particular dictionary being used and the structure of its word articles.

Use the five-way navigator to scroll in longer word definitions. The arrows  located in the down part of the *Word Article* indicate the direction in which you can scroll.

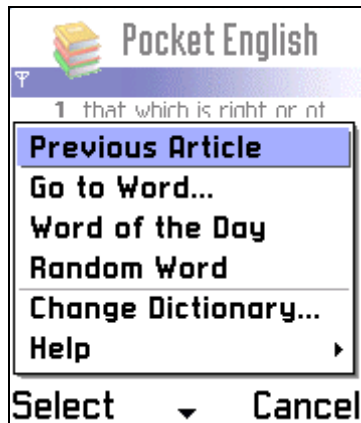

Press the **Back button** to return to the *Word List* at any time.

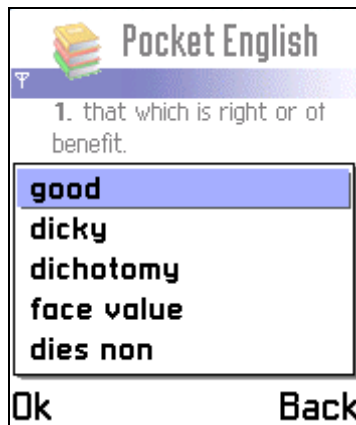

### *Word History*

MSDict keeps history list of all words opened for a working session and allows you to move in this list to recall visited words. The navigation in the history list is handled through the *Options menu*.

To move to the previous opened word, select **Previous Article** from the *Options pop-up list*.

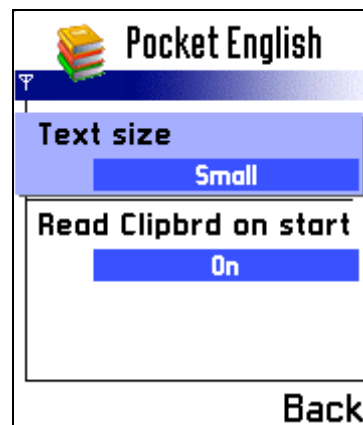

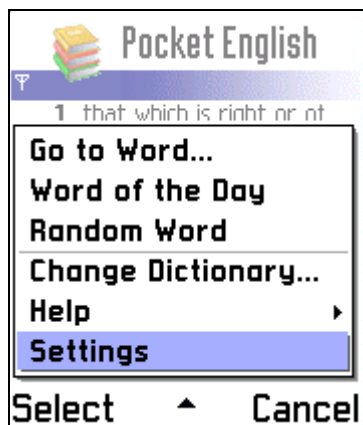

To move to any other word from the history list, use **Go to Word** option. Then select the desired word from the list that will appear.

## Settings

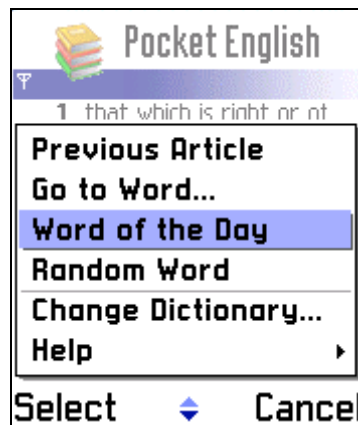

Through the *Settings options* you can change the font size in *Word Article* and specify whether the program should read the contents of the system clipboard when starting. To open the Settings form, press **Options** while you are in *Word Article*, scroll in the menu that will appear and select **Settings**.

Use the five-way navigator to switch between the settings and **OK** to change the setting values.

## ***Learning Features***

The MSDict *Options menu* in *Word Article* is designed to stimulate the new words learning process, especially for foreign language learners. The **MSDict** menu can be called through the **Options button**.

The program offers the following learning features:

- Word of the day - a random word, taken from the dictionary, which is updated daily in this section. No matter how many times you tap on this menu item, you will get the same word until the new day comes.
- Random word - word randomly picked up from the currently active dictionary
