## Introduction of Vietnamese Advanced Keyboard (VNAK)

---

With a desire to support Vietnamese language on Windows Mobile devices, PPCLINK Mobile Software has researched and developed **Vietnamese Advanced Keyboard (VNAK)** which includes advanced features as:

- Windows Mobile 5.0 ready
- Now support **Telex** and **VNI** input method
- Word completion in both Vietnamese and English
- Smart tone mark
- Autocorrect option
- Sinkable
- Compatible *with Pocket PC 2002/ WM 2003/WM 2003 SE* and *Windows Mobile 2005*

## Installation for Pocket PC

---

Requirements: The product needs **200 KB** of free space in main memory, if you want to install **Vietnamese Advanced Keyboard Skin**, please check corresponding skin size. You need to have MS Active Sync Software on your device.

1. Unzip downloaded file to a folder with a zip tool. The popular unzip program **WinZip** is available at [www.winzip.com](http://www.winzip.com)
2. Run setup and follow instructions
3. When finished, go to **SIP** Button then you will see "**VN Advanced Keyboard**" in the list

We recommend storing in the Storage Card when the installation asks to select **Main memory** or **Storage Card**.

---

 You can copy the CAB file to your device and run the CAB file directly but it will automatically install the software to the main memory.

---

## Uninstallation

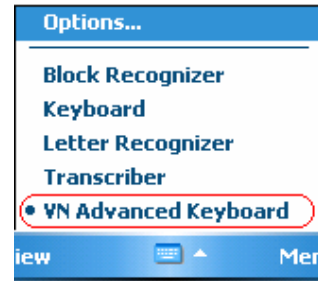

---

To remove the product from your Pocket PC:

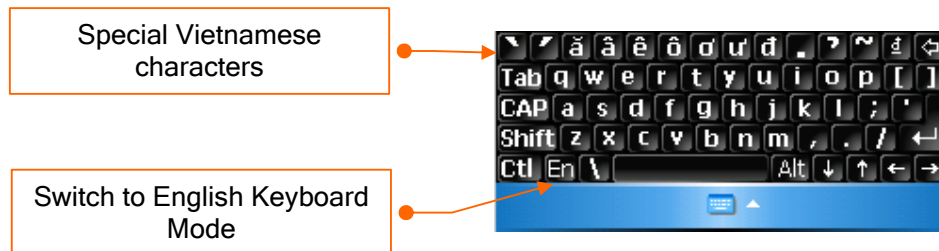

1. Select standard keyboard first
2. Do Soft-reset your device
3. Go to **Start menu >> Settings**
4. Open **System** and tap on **Remove Programs**
5. Select **VN Advanced Keyboard** from the list and tap on the **Remove** button then VNAK will be removed.

## How to use

From list of keyboards, select VNAK as the beside picture. Then you will see the keyboard as below picture

Please remember to select Unicode Vietnamese font in the application you want to input Vietnamese character.

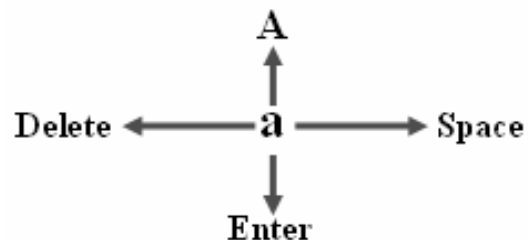

You can switch to English by a tap on the **En** key or oppositely to Vietnamese by a tap on the **Vn** key also.

Vietnamese is accented language; there are acute accent, grave accent, tilde accent, dot accent and circumflex accent. You can see all accented letters such as **ô, ơ, ă, â, ê, đ, ư** and other accents on the first line of keyboard as below:

If you think that the backspace key is too far, yes, a very fast way to backspace is to use sliding. These are rules, sliding up is **Shift** key. Sliding backwards is **Delete** key and sliding forwards is **Space** key. You can also delete with a slide on the backspace key. This below triangle will help you see clearer.

## Word Completion

This is special feature in VNAK, when typing you can see word suggestion text box in both English and Vietnamese as the below picture.

 You have to enable this feature in VNAK option to use it properly

As the picture beside, you can see suggestion words in both English and Vietnamese.

### **Auto Correct**

One of the most important feature in VNAK is autocorrect feature; it will help you saving time when typing repeated words or phrase,

*For example:* you can define

1. **VN= Việt Nam**
2. **TC= Thành công**

Then when typing if you type **VN + {Space}**, it will replace VN by "**Việt Nam**" to the document. Or **TC+ {Space}** then TC will be replaced by "**Thành công**"

### **Regulation of Tone Mark**

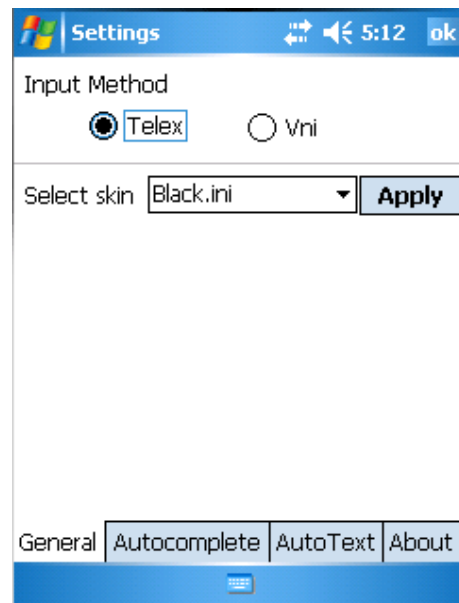

In VNAK, we are using natural tone mark, because the limitation of Pocket PC Keyboard size so the Telex and VNI Tone Mark have not been used in VNAK

### **VNAK Options**

#### **General Tab:**

This option will allow you to select input method and change VNAK skin.

After adjust these parameters, remember to tap on "**Apply**" button to save the changes

## Autocomplete Tab:

You can set parameters for Word Completion in this screen

## AutoText Tab:

This option will allow you to define/modify parameters for **Auto correct feature**.

*On/Off Autotext:* to turn on/off this feature in VNAK

*Add a space after autotext:* if this option checked then it will automatically added a space after replacing.

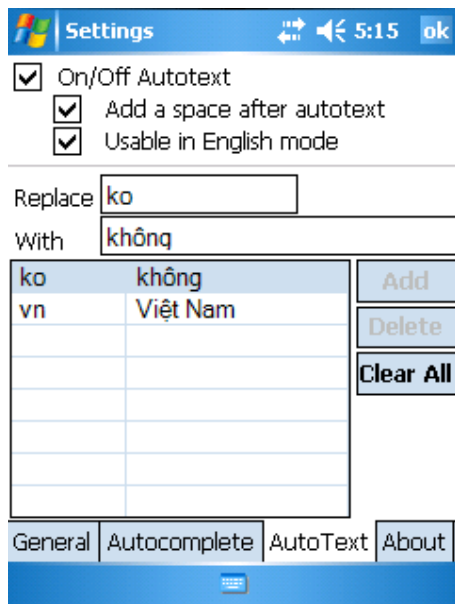

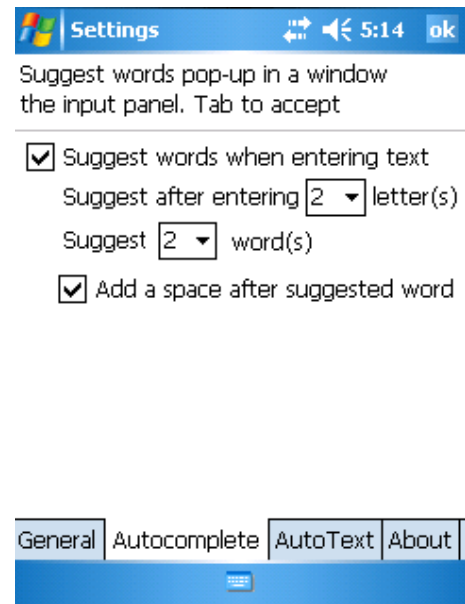

*Usable in English mode:* if this option checked then you can use this feature in English Keyboard mode.

You can create new your **autotext word list** by enter abbreviation in "**Replace**" text box

And enter correct word in "**With**" text box then tap on "**Add**" button to save it in the list.

## About Tab:

This screen will show product and registration information. You can register the VNAK and check its version here.

## **How to buy and register Vietnamese Advanced Keyboard**

---
