

Thank you for your interest in the **BUSINESS-PROFESSIONAL RINGTONE COLLECTION V3.0.**

This document will give you a short overview of what is included in the package.

Before buying this product please be shure, your mobile phone or smartphone supports mp3 or wav files. Your user manual provided with your mobile phone should tell you if mp3 or wav sounds are supported. In this version only mp3 and wav files are delivered.

All sounds were recorded at DirectDance studios. For this, we recorded digital and analog telephones with high quality microphones.

All other ringtones were created by using our plenty of stand alone sound modules and

sampleres, mixed with our mixing desk and finalized it with eq's and compressor for an optimum sound.

Pleae aware, that those sounds are not optimized for playing on a normal hifi system !

The demo contains a spoken voice and a drumloop at low volume with some of the ringtones in the background. This is for getting an idea how the ringtones are sounding. In the fullversion, all ringtones are mixed present and loud without any vocals or other noises.

Categories in the full version:

RealTone Rings, 29 Ringtones

Future Rings, 39 Ringtones

Voice Rings, 32 Ringtones

Effect Rings, 9 Ringtones
