# Pedia Dosage Guide

Installation
- To install Pedia Dosage Guide, include PDG.prc and PediaDrugs.pdb

Find Drug
- Two ways to locate a drug: Clicking and Manual input.
- Clicking: Click the category popup and select the drug category. A drug popup will be displayed. Click the drug popup and select the drug.
- Manual input: Enter the name of the drug on the field and click the search result on the list box to display the drug properties.

Dosage Calculator
- This can be accesed by either goin to the menu and selecting Calc or by clicking on the Recommended Dose title bar.

- Calculator Image

- Example problem. Using a recommended dose of 20-30 mg/k/D BID (po) on a patient weighing 16 kilos and selecting a preparation of 250 mg/5ml susp, we fill the calculator by :

Dosage Calculator

RD : 25   ▼ BID

Child Weight (kg) : 16

Prep : 250   per : 5

[Calculate]

Suggested dose : **4.00**

[Clear] [Done]
