

Mad Macs User's Guide for S60

Noumena Innovations 2004-9

As an added bonus, your game package will include our newly upgraded MGS version 2.X which allows you to go online and challenge other players from around the world to your favorite games! Once you have successfully registered, you can login, download and play a multitude of MGS online games for free!

Note: you will be responsible for data usage fees as charged by your service provider.

Install the game

If you have received **MGS MAD MACS** on a compact disc provided by your phone provider or downloaded the game from the internet, then follow the installation instructions below. If the full version game is provided to you e.g. on your MMC, then you may go directly to the "Playing **MGS MAD MACS**" section.

STEP ONE: Transfer the MGS and game files (*.sis files) from the PC to your phone via IrDA or Bluetooth.

STEP TWO: In your Messages/Inbox, open the *.sis files to launch the installer. Follow the instructions that are automatically prompted during the installation. Be sure to install all the files in the same location.

STEP THREE: Once the installation is successfully completed, you will see a large red **M** symbol (for MGS) on your desktop. Launching it will bring you to the MGS game list menu. **MGS MAD MACS** can be launched from there.

Note: *Memory card e.g. MMC installation is supported, but MGS and the game should be installed in the same driver/location.*

How to play

1-1 Mac controlling

1-1.1 Movement mode:

Movement control:

- **Navigation left/right key:** Mac turn left/right.
- **Navigation up/Down key:** Look up/down.
- **Press the navigation key:** Mac move forward.
- **Left soft Key:** Choose and use weapon or Item.
- **Right soft Key:** Call out the game menu, you can:
 - End current action turn.
 - Adjust sound FX and music volume.
 - Turn on/off the hints.
 - Quit play.

Screen layout:

- **Radar:** Display the position of friend macs and enemy macs. Current mac is in the center of the Radar. Radar's "up" is the direction that current mac is facing. Red points are enemy macs while white points are friend macs.
