

## Thank you for your interest in the **BUSINESS-PRIVATE VOICERINGS BIG PACK - Future Ringtone Edition !**

This document will give you a short overview of what is included in the package. The listing of the voice ringtones can be found on page -2-.

Before buying this product please make shure, your mobile phone or smartphone supports mp3 files for ringtone and wav files for notification playback. Your user manual provided with your mobile phone should tell you if those formats are supported. In this version only mp3 files for ringtones and wav files for notifications are delivered.

All sounds were recorded at DirectDance studios. For

this, we recorded digital and analog telephones with high quality

microphones. All ringtones were processed by using our plenty of stand alone sound modules and samplers, mixed with our mixing desk and finalized it with eq´s and compressor for an optimum sound.

Pleae aware, that those sounds are not optimized for playing on a normal hifi system !

The mp3 demo contains a spoken voice and a musicloop at low volume with some of the ringtones in the background. This is for getting an idea how the ringtones will sound. In the fullversion, all ringtones are mixed present and loud without any noise.

### *Categories in the full version:*

*General VoiceRings  
Business VoiceRings  
Private VoiceRings  
Notifications*

All VoiceRings are made for caller id programs. So, you can assign special ringtones to each of your contacts - you will know who is calling and if it is important or not ...

All Voice-Rings are recorded with male / female artists and combined with two different ringtones.

All the best from
